Subject: Weekly call notes

Ellen/Marie:

Haven't been able to stay on a weekly call all the way through in weeks, and I apologize due to training, and meetings that couldn't be missed.

Unfortunately this Wed is HAZWOEPR and I cant miss that either. So here are some thoughts on last weeks agenda/notes. Thanks so much for your patience.

Dave

Other Fieldwork:

CAD Cell inspections-this item has been left current way for some time. I don't believe I have seen recommendations from Jacobs on inventory/purchase potential.

Can we get feedback on that?

Under meetings and other activities:

Aerovox 21 e project—Phase II RAP- Notes should reflect only that we expect next version of Phase III on June 30, 2017.

SuperJTI can come off the agenda until I indicate otherwise. Waiting for CNB and I will keep

asking on my own

Change AVX to Aerovox Group meeting

Deliverables

Item B2 I am having trouble finding an email attachment of this document and can't find it on Battelle Sharepoint. Can someone resend it?

(comparison study of high res/low res homolog analysis)

Item J7: We need to establish a date on the calendar for the pipeline relocation at this time to establish a timeframe that the Corps has to review this document.

This is a critical path item for both the hybrid dredging and BV dredging. It has to be done so lets' put it on the calendar so this doesn't become an issue.

J9: Notes indicated EPA hasn't commented (Karen). I am fairly certain we have. Please remove notes or advise me otherwise. Thanks

Right of Entry

17-1, 17-3,: Notes should simply read that I have turned the matter over to EPA's legal staff for follow up due to non-responsiveness.
